

Top to Bottom Value.

Broadwind Energy is creating an ultra-responsive North American wind energy supply chain with manufacturing plants, service and maintenance centers across the map.

Strategy-to-Action: Our wind tower manufacturer, Manitowoc, Wis.-based Tower Tech Systems, is building new plants in Sioux Falls, S.D. and Abilene, Texas. With proximity to sites, Tower Tech will reduce transportation costs for development in the upper and lower United States.

Our companies are injecting efficiency and extracting cost from North American wind energy development. Check back – there's more to come.

Wherever you turn, we'll be there.™
